Implement Vocational Skills Training and Facilitate Potential Migrant Workers for Foreign Employment

1. Background

The Safer Migration (SaMi) Program

Safer Migration (SaMi) Program is a bilateral initiative between the Government of Nepal and the Government of Switzerland. It is implemented by the Ministry of Labor, Employment and Social Security and 156 participating local governments. Helvetas Nepal provides technical assistance to the program on behalf of the Swiss Agency for Development and Cooperation (SDC).

The program has goal to ensure that migrants and their families are better protected by concerned Nepali institutions and benefit from decent work conditions abroad. Since its inception in 2011 (as Safer Migration Project), SaMi aims to increase economic benefits from foreign employment to migrants and their families while mitigating the social costs of migration. It does so by improving access to information, access to justice, vocational skills, financial literacy and psychosocial counselling for migrant workers and their families

Skilling of Potential Migrant Workers

SaMi's vocational skilling component aims to impart skills training to the prospective migrants who have little or no prior experience in the occupation. It provides them with one-month (equivalent to 208 hours) residential training, with the focus on developing their practical skills. The proposed vocational training enables prospective migrants being hired as helpers to semi-skilled and skilled workers rather than general laborer, giving them a better chance of career progression⁴.

SaMi has been collaborating with 10 training management institutes (TMIs) located in Kathmandu valley, Dhanusha, Rupandehi, Kaski and Jhapa in conducting skills trainings for SaMi. The TMIs were selected based on specific criterias set by the program, such as good infrastructure with sufficient tools, equipment and material, availability of a separate workstation for each trainee, and clean residence for trainees. Vocational skill trainings is currently being conducted in eight occupations: Shuttering carpentry, Scaffolding, Industrial electrician, Plumbing, Welder, Pipe Fitter, Housekeeping/Cleaner and Garment machine operator.

SaMi has planned to train 1100 PMW in Shuttering carpentry, scaffolding, industrial electrician, plumbing, Welder, Pipe Fitter, Housekeeping/Cleaner and garment machine operator trades in this fiscal year. SaMi has planned to train 255 out of 1100 PMW in garment machine operator and this RFP has published to select at least two TMI for implementation of garment machine operator. In addition to technical skills related to specific occupations, trainees also learn occupational health & safety and life-skills, such as understanding the culture of the destination country, basic communication skills, managing finances and

⁴ A number of tracer studies conducted by SaMi has shown that migrants who have successfully completed the skills training tend to earn on average 20-25% more than unskilled workers and are also more likely to be hired as semi-skilled or skilled workers in their second, third or fourth migration cycle.

maintaining relationship with family over long distance. After the completion of training, trainees undergo an end of training test, which is conducted by the certified assessors of the National Skill Testing Board (NSTB) and receive certificates, who met standard of the skill test.

2. Scope, target and implementation modality

Overview

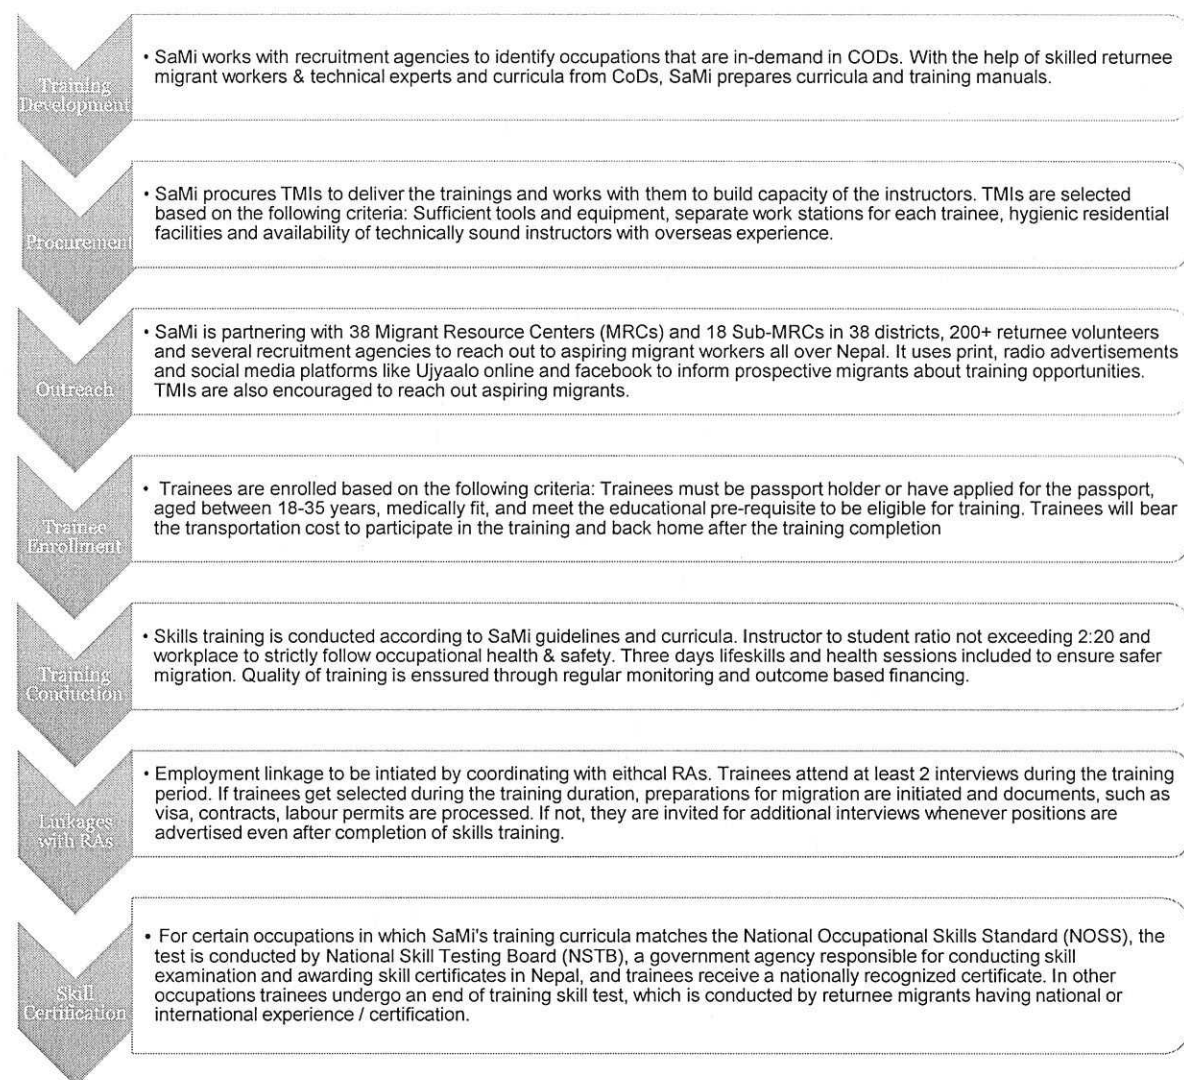

SaMi is planning to organize center-based residential Vocational Skills Training for approximately 1100 potential migrant workers from all over Nepal in the FY 2022/23. 255 out of 1100 PMW will be trained in garment machine operator in Kathmandu valley only. SaMi will cover the costs for the training, food and accommodation including independent skills assessment.

The proposed skills trainings are specifically designed and developed based on labour market and skills demand in the major destination countries. Curricula are developed in consultation with returnee migrant workers with several years of work experience abroad in same occupation, skills development experts and employers/companies based in destination countries. The training lasts a total of **30 days**⁵ and includes modules on occupational skills in specific occupations as well as life/soft skills and health to best prepare migrants to adapt to the living conditions of the destination countries. At the end of the training, skills test is conducted to verify the competencies and knowledge acquired by the trainees and ensure training quality. There are two modalities for end of training assessment. Occupations in which National Skill Testing Board (NSTB) has relevant standards and testing mechanism, skill assessment and certification are conducted by National Skill Testing Board (NSTB). Else, independent assessors are hired by SaMi to conduct assessment and trainees receive certificates awarded by SaMi, who meet the set standards.

⁵ 30 days includes 4 days holiday of weekend
