Routes of nature, adventure and living culture in San Martin

A tour that allows you to experience adventure, nature and living cultures at its best, share ancestral customs of the Awajun indigenous community, navigate through the Mayo River and immerse yourself in the forested wetlands of Tingana and Santa Elena, an atypical wetland located 850 meters above sea level, housing a rich variety of flora and fauna with unique characteristics. On this route you can also visit El Morro Calzada, a unique hill that rises 575 meters high among the vast vegetation, turning it into a 360° panoramic and natural viewpoint, from where you can see the cities of Rioja and Moyobamba, cities recognized for its jungle gastronomy, the butterfly garden of Palestine and its variety of impressive orchids, as part of the tour you will visit a huge cave with ancient and imposing formations of stalactites and stalagmites, forming part of the scenery a wide variety of species of birds, reptiles, fish, and insects that have found their natural refuge in Alto Mayo.
