

2026 GLOBAL HUNGER INDEX

No Security without Food Security

October 21, 2026, 4:30–5:45 PM CET

Hybrid event: Room 203, Uni Bern,
Hallerstrasse 6, Bern, and online

Food security is fundamental to people's health, livelihoods and prospects for the future. When conflict, extreme weather or economic shocks disrupt daily life, access to food and income often becomes the first urgent concern.

The event will explore how hunger, insecurity and resilience are connected, and what is needed to strengthen food systems, protect livelihoods and support long-term food and nutrition security, resilience and peace.

Registration is free. If you attend onsite in Bern, you're invited to join us at a networking happy hour after the event.

Register now:
